About

Quick-learning software engineer with strong adaptability to new technologies, an ownership mindset, and the ability to work independently or in collaborative teams. Experienced in problem-solving and applying best practices to develop efficient and maintainable software solutions. Driven to continuously learn and contribute to high-quality product development.

Education

University of Moratuwa, BSc (Hons) in Information Technology 2022 – 2026

- Cumulative GPA (CGPA): 3.40
- Relevant Coursework: Data Structures, Software Engineering, Databases, Web Development, Networking, Software Designs, Software Testing, UI/UX Engineering

J/Methodist Girls' High School, Secondary Education 2018 – 2020

- Physical Science Stream – 2AB

Experience

Full Stack Developer – Northern Engineering Consortium Pvt Ltd Nov 2025 – Present

- Leading development of Servicely multi-platform service marketplace using ASP.NET Core, React, React native and PostgreSQL.
- Developed backend architecture, Admin web application, and coordinated mobile app development.
- Managed production deployments: Backend on AWS EC2, Admin Web on Vercel, and Mobile App release to Google Play Store.
- Implemented job lifecycle management, role-based access, payment workflow, and notification system.

Software Engineer Intern – Mindox Techno Pvt Ltd Mar 2025 – Aug 2025

- Designed and developed a WPF-based automation testing tool using C#, TCP/IP, gRPC, and JSON serialization, following Agile workflows and Azure DevOps task management practices.
- Implemented backend features for industrial systems (ASMPT and 3C Mighty Engine), including simulator communication and database integration.
- Conducted system testing, log analysis, and error troubleshooting, and produced professional technical documentation using Doxygen to support maintainability and knowledge transfer.

Technical Skills

- **Programming:** C#, Java, C, JavaScript
- **Web Technologies:** ASP.NET Core, Spring Boot, React, HTML, CSS, Bootstrap
- **Mobile Technologies:** React Native (Expo)
- **Databases:** MSSQL, PostgreSQL, MySQL, Mongo DB
- **Cloud & Deployment:** AWS EC2, Vercel, Google Play Store Deployment
- **Version Control:** Git, GitHub
- **Tools & Others:** Azure DevOps, Docker, Postman, Figma, Jira

Projects

Final Year Research (Individual – University of Moratuwa)

Jan 2026 - Present

Privacy-Preserving Healthcare Prediction Framework (MedTrust)

- Designed a privacy-preserving healthcare prediction system using Federated Learning, Blockchain, and Explainable AI.
- Implemented distributed model training across multiple hospital nodes without sharing raw patient data.
- Integrated SHAP-based explainable AI and blockchain audit logging for transparent and secure predictions.
- **Technologies:** Python, PyTorch, Federated Learning, Blockchain, SHAP, Machine Learning.

Software Engineer (Individual – Mindox Techno Pvt Ltd)

Jun 2025 – Aug 2025

Dynamic Functionality Tester

- Designed and developed a modular automation testing tool for configuring and executing command sequences across multiple hardware simulators with real-time monitoring and validation.
- Implemented JSON-based sequence creation and execution, enabling reusable automated test scenarios and faster testing cycles.
- Built parallel simulator connections, live logging, structured error handling, and a user-friendly desktop interface.
- **Technologies:** C#, .NET SDK 8, WPF, JSON, TCP/IP Networking, Multithreading

Full Stack Developer (Team – G3 Technologies)

Sep 2023 – Jun 2024

Project Management System

- Developed a web-based Project Management System for handling projects, managing roles, tracking deadlines, and monitoring financial status.
- **Individual Contribution:** Implemented authentication, user management, and email notifications.
- **Technologies:** React, Bootstrap, ASP.NET (C#), MSSQL.
- **View Project:**  Backend |  Frontend

Backend Developer (Team – University of Moratuwa)

Oct 2024 – Nov 2024

Online Shopping Platform (Microservices Architecture)

- Developed RESTful APIs using microservices architecture and designed inter-service communication for modularity and scalability.
- **Individual Contribution:** Implemented authentication using JWT and containerized services using Docker.
- **Technologies:** Java, Spring Boot, MySQL, JWT, Docker.
- **View Project:** 

Soft Skills

- Time Management
- Communication
- Leadership
- Teamwork & Collaboration
- Critical Thinking
